

Test case Author:	Nguyen Quang Vinh, Lu Thua Thong
Tester Name:	Nguyen Quang Vinh, Lu Thua Thong, Dao Van Hieu, Dinh Thi Lan Hue, Le Hong Phong, Le Thanh Trung
Project Name:	Enterprise Web Software Development
Date Tested:	18-Apr.-20

Test Case ID	Test Description	Category	Condition	Test Result	Actual Result	Project's Requirement
Admin's Test Log						
ADLogin01	Admin login successful with provided Username and Password	Admin Login	Username and Password must exist on the database	Redirected to the Dashboard of current admin account	Pass	Admin can login website with right Username and Password
ADDashBoard00	Admin can not view Dashboard's panels	Admin DashBoard	Must Login to Admin	Admin was not be able to access and view DashBoard page because this page is bugged and not displaying information	FAIL	Admin had a dashboard
ADDashBoard01	Admin can view Dashboard's panels	Admin DashBoard	Must Login to Admin	Admin role will be able to access and view DashBoard page	Pass	Admin had a dashboard
ADDashBoard02	Admin can download exception reports by clicking on Download button	Admin DashBoard	Exception reports must have Student and Student must not have chosen a personal Tutor	Export Correct Student Information	Pass	Admin can Export Student Profile without Tutor
ADDashBoard03	Admin can download exception reports by clicking on Download button	Admin DashBoard	Exception report must have Student and that Student have not send message for 7 to 28 days	Cannot Export Correct Student Information	Pass	Admin can Export Student Profile without Tutor
ADDashBoard04	Admin can view average messages in 7 Days	Admin DashBoard	Display Correct Number of Messages sent in 7 Days	Correct Display of Number of Messages	Pass	Admin can Export Number of Messages for All Users
ADDashBoard04	Admin's DashBoard will display average number of messages for All Users	Admin DashBoard	Must have at least one message in the system for display	Correct Display of Users' Fullnames and Average Messages	Pass	Admin must be able to view sisplay of Users' Fullnames and Average Messages
ADChangePassword	Admin must be able to change admin account's password	Admin Change Password	Admin must login	Admin is able to change password by entering new password details	Pass	Admin role must be able to change their current password
ADManagementRoles01	Admin can add new role by entering new Role Name and Role Description	Admin Add New Role	Admin must click on Add New Role button	Admin is able to add new role into the system by clicking on add new role button and fill the the required fields	Pass	Admin role must be able to add new user roles
ADManagementRoles02	Admin can edit role by entering new Role Name and Role Description	Admin Edit Role	Admin must click on Edit Role button	Admin is able to edit role in the system by clicking on edit role button and fill the the required fields	Pass	Admin role must be able to edit user roles
ADManagementRoles03	Admin can delete role by clicking on delete button	Admin Delete Role	Admin must click on Delete Role button	Admin is able to delete role in the system by clicking on Delete Role button	Pass	Admin role must be able to delete user roles
ADManagementUsers01	Admin can not add new user into the system	Admin Add New User	Admin Role can not add new users / Current Account must be Admin Account	Admin was not able to add new user by clicking on the Add New User button and fill in the required fields	FAIL	Admin role must be able to add new user
ADManagementUsers02	Admin can add new user into the system	Admin Add New User	Only Admin Role can add new users / Current Account must be Admin Account	Admin is able to add new user into the system by clicking on the Add New User button and fill in the required fields	Pass	Admin role must be able to add new user
ADManagementUsers03	Admin can edit existing users in the system	Admin Edit User	Only Admin Role can edit users / Current Account must be Admin Account	Admin is able to edit existing user in the system by clicking on the Edit User button and fill in the required fields	Pass	Admin role must be able to edit user
ADManagementUsers04	Admin can delete existing users in the system	Admin Delete User	Only Admin Role can delete users / Current Account must be Admin Account	Admin is able to deactivate existing users by clicking on deactivate button	Pass	Admin role must be able to delete user

ADManagementTutor01	Admin can add new tutor into the system	Admin Add New Tutor	Admin Role can add new tutors	Admin is able to add new tutor into the system by clicking on the Add New Tutor button and fill in the required fields	Pass	Admin role must be able to add new tutor
ADManagementTutor02	Admin can edit existing tutors in the system	Admin Edit Tutor	Admin Role can edit tutors	Admin is able to edit existing tutor in the system by clicking on the Edit Tutor button and fill in the required fields	Pass	Admin role must be able to edit tutor
ADManagementTutor03	Admin can delete existing tutors in the system	Admin Delete Tutor	Admin Role can delete tutors	Admin is able to delete tutor in the system by clicking on Delete Tutor button	Pass	Admin role must be able to delete tutor
ADManagementStudent01	Admin can add new student into the system	Admin Add New Student	Admin Role can add new student	Admin is able to add new student into the system by clicking on the Add New Student button and fill in the required fields	Pass	Admin role must be able to add new student
ADManagementStudent02	Admin can edit existing students in the system	Admin Edit Student	Admin Role can edit students	Admin is able to edit existing student in the system by clicking on the Edit Student button and fill in the required fields	Pass	Admin role must be able to edit student
ADManagementStudent03	Admin can delete existing students in the system	Admin Delete Student	Admin Role can delete students	Admin is able to delete student in the system by clicking on Delete Student button	Pass	Admin role must be able to delete student
ADManagementRoom01	Admin can add new room into the system	Admin Add New Room	Admin Role can add new room	Admin is able to add new room into the system by clicking on the Add New Room button and fill room name	Pass	Admin role must be able to add new room
ADManagementRoom02	Admin can edit existing rooms in the system	Admin Edit Room	Admin Role can edit rooms	Admin is able to edit existing room in the system by clicking on the Edit Room button and fill in room name	Pass	Admin role must be able to edit room
ADManagementRoom03	Admin can delete existing rooms in the system	Admin Delete Room	Admin Role can delete rooms	Admin is able to delete room in the system by clicking on Delete Room button	Pass	Admin role must be able to delete room
ADBlog01	Admin can create new blog	Admin Add New Blog	Admin must login	Admin successfully create a new blog post on blog page	Pass	Admin role must be able to add new blog
ADBlog02	Admin can edit admin's blog post	Admin Edit Blog	Admin must login	Admin successfully edit blog written by admin on blog page	Pass	Admin role must be able to edit blog post written by admin
ADBlog03	Admin can comment on all blog posts	Admin Comment Blog	Admin must login	Admin successfully comment on a blog post on blog page	Pass	Admin role must be able to comment on all blog posts
ADExport00	Admin can not export file from the database system	Admin Export File	Admin must login	Admin was not able to perform export function correctly because the page returns empty file	FAIL	Admin role must be able to export user data file into the system
ADExport	When Admin clicks on Download button, it will automatically download User Data table	Admin Export File	Admin must login	Admin successfully export user data file by clicking on Download button	Pass	Admin role must be able to export user data file from the system
ADImport00	Admin can not import file into the database system	Admin Import File	Admin must login	Admin was not able to perform import function because the function is missing and page is empty	FAIL	Admin role must be able to import user data file into the system
ADImport01	Admin chooses correct data type file (excel) in their PC, then admin will click on Upload button to import	Admin Import File	Admin must login	Admin successfully import user data file by choose correct data type file and click on the Upload button	Pass	Admin role must be able to import user data file into the system
ADAllocate01	Admin can allocate tutor and student to existing rooms in the system	Admin Allocate	Tutor and Student can only appear once in one room	Admin is able to allocate tutor and student to the corresponding room	Pass	Admin role must be able to allocate tutor and student to their rooms in the system
ADAllocate02	Admin can edit tutor and student in an existing room in the system	Admin Allocate	Room must exist in the allocate management in order for admin to perform edit function	Admin is able to edit room by adding or removing tutor and student from existing room	Pass	Admin role must be able to edit tutor and student in an existing room in the system

ADAllocate03	Admin can delete existing room in the allocate management list	Admin Allocate	Room must exist in the allocate management in oder for admin to perform delete function	Admin is able to delete room by clicking on delete button	Pass	Admin role must be able to delete existing room in the allocate management list
ADDocument00	Admin can not upload new document into the system	Admin Upload Document	Admin must first choose a file to upload before clicking on upload or submit button & Page must exist	Admin was not able to use this function because the Upload Document page is missing	FAIL	Admin role must be able to upload new document into the system
ADDocument01	Admin can upload new document into the system	Admin Upload Document	Admin must first choose a file to upload before clicking on upload or submit button	Admin is able upload new document into the system by choosing correct file, fill in the descriptions and click on submit button	Pass	Admin role must be able to upload new document into the system
ADMeeting01	Admin can add new meeting in system calendar	Admin Meeting	Admin must fill in all required fields in meeting options	Admin is able to add new meeting in the system calendar	Pass	Admin role must be able to add new meeting in the system calendar
ADMeeting02	Admin can reset meeting options to previous chosen state	Admin Meeting	The meeting fields must be already filled in order to perform reset function	Admin is able to reset meeting fields to previous choosen state by clicking on reset button	Pass	Admin role must be able to reset meeting fields
<u>Staff's Test Log</u>						
StaffLogin01	Staff login successfully with provided Username and Password	Staff Login	Username and Password must exist on the database	Redirected to the Dashboard of current staff account	Pass	Staff can login website with right Username and Password
StaffLogin02	Staff login failed with provided Username and Password	Staff Login	Username and Password did not exist on the database	Display the wrong pass/username message	Pass	Staff can login website with right Username and Password
StaffDashBoard00	Staff can not view Dashboard's panels	Admin DashBoard	Must Login to Staff	Staff role was not be able to access and view DashBoard page because this page is missing	FAIL	Staff had a dashboard
StaffDashBoard01	Staff can view exception reports	Staff DashBoard	Exception reports must have Student and Student must not have personal Tutor	Export Correct Student Information	Pass	Staff can Export Student Profile without Tutor
StaffDashBoard02	Staff can view exception reports	Staff DashBoard	Exception report must have Student and that Student have not send message for 7 to 28 days	Cannot Export Correct Student Information	Pass	Staff can Export Student Profile without Tutor
StaffDashBoard03	Staff can view total messages in 7 Days	Staff DashBoard	Display Correct Number of Messages sent in 7 Days	Correct Display of Number of Messages	Pass	Staff can Export Number of Messages for All Users
StaffDashBoard04	Staff's DashBoard will display average number of messages for All Users	Staff DashBoard	Must have at least one message in the system for display	Correct Display of Users' Fullnames and Average Messages	Pass	Admin must be able to view sisplay of Users' Fullnames and Average Messages
StaffChangePassword	Staff must be able to change staff account's password	Staff Change Password	Staff must login	Staff is able to change password by entering new password details	Pass	Staff role must be able to change their current password
StaffManagementTutor01	Staff can add new tutor into the system	Staff Add New Tutor	Staff Role can add new tutors	Staff is able to add new tutor into the system by clicking on the Add New Tutor button and fill in the required fields	Pass	Staff role must be able to add new tutor
StaffManagementTutor02	Staff can edit existing tutors in the system	Staff Edit Tutor	Staff Role can edit tutors	Staff is able to edit existing tutor in the system by clicking on the Edit Tutor button and fill in the required fields	Pass	Staff role must be able to edit tutor
StaffManagementTutor03	Staff can delete existing tutors in the system	Staff Delete Tutor	Staff Role can delete tutors	Staff is able to delete tutor in the system by clicking on Delete Tutor button	Pass	Staff role must be able to delete tutor
StaffManagementStudent01	Staff can add new student into the system	Staff Add New Student	Staff Role can add new student	Staff is able to add new student into the system by clicking on the Add New Student button and fill in the required fields	Pass	Staff role must be able to add new student
StaffManagementStudent02	Staff can edit existing students in the system	Staff Edit Student	Staff Role can edit students	Staff is able to edit existing student in the system by clicking on the Edit Student button and fill in the required fields	Pass	Staff role must be able to edit student

StaffManagementStudent03	Staff can delete existing students in the system	Staff Delelete Student	Staff Role can delete students	Staff is able to delete student in the system by clicking on Delete Student button	Pass	Staff role must be able to delete student
StaffManagementRoom01	Staff can add new room into the system	Staff Add New Room	Staff Role can add new room	Staff is able to add new room into the system by clicking on the Add New Room button and fill room name	Pass	Staff role must be able to add new room
StaffManagementRoom02	Staff can edit existing rooms in the system	Staff Edit Room	Staff Role can edit rooms	Staff is able to edit existing room in the system by clicking on the Edit Room button and fill in room name	Pass	Staff role must be able to edit room
StaffManagementRoom03	Staff can delete existing rooms in the system	Staff Delete Room	Staff Role can delete rooms	Staff is able to delete room in the system by clicking on Delete Room button	Pass	Staff role must be able to delete room
StaffBlog00	Staff's new blog post does not display name of the current logged in account	Staff Add New Blog	Staff must login	Staff Blog Post function did not display correct information generated from database	FAIL	Staff role must be able to add new blog
StaffBlog01	Staff can create new blog	Staff Add New Blog	Staff must login	Staff successfully create a new blog post on blog page	Pass	Staff role must be able to add new blog
StaffBlog02	Staff can edit admin's blog post	Staff Edit Blog	Staff must login	Staff successfully edit blog written by admin on blog page	Pass	Staff role must be able to edit blog post written by admin
StaffBlog03	Staff can comment on all blog posts	Staff Comment Blog	Staff must login	Staff successfully comment on a blog post on blog page	Pass	Staff role must be able to comment on all blog posts
StaffAllocate01	Staff can allocate tutor and student to existing rooms in the system	Staff Allocate	Tutor and Student can only appear once in one room	Admin is able to allocate tutor and student to the corresponding room	Pass	Staff role must be able to allocate tutor and student to their rooms in the system
StaffAllocate02	Staff can edit tutor and student in an existing room in the system	Staff Allocate	Room must exist in the allocate management in oder for staff to perform edit function	Staff is able to edit room by adding or removing tutor and student from existing room	Pass	Staff role must be able to edit tutor and student in an existing room in the system
StaffAllocate03	Staff can delete existing room in the allocate management list	Staff Allocate	Room must exist in the allocate management in oder for staff to perform delete function	Staff is able to delete room by clicking on delete button	Pass	Staff role must be able to delete existing room in the allocate management list
StaffDocument00	Staff can not upload new document into the system	Staff Upload Document	Staff must first choose a file to upload before clicking on upload or submit button & Page must exist	Staff was not able to use this function because the Upload Document page is missing	FAIL	Staff role must be able to upload new document into the system
StaffDocument01	Staff can upload new document into the system	Staff Upload Document	Staff must first choose a file to upload before clicking on upload or submit button	Staff is able upload new document into the system by choosing correct file, fill in the descriptions and click on submit button	Pass	Staff role must be able to upload new document into the system
StaffMeeting01	Staff can add new meeting in system calendar	Staff Meeting	Staff must fill in all required fields in meeting options	Staff is able to add new meeting in the system calendar	Pass	Staff role must be able to add new meeting in the system calendar
StaffMeeting02	Staff can reset meeting options to previous chosen state	Staff Meeting	The meeting fields must be already filled in order to perform reset function	Staff is able to reset meeting fields to previous choosen state by clicking on reset button	Pass	Staff role must be able to reset meeting fields
Student's Test Log						
StudLogin01	Student login successfully with provided Username and Password	Student Login	Username and Password must exist on the database	Redirected to the Dashboard of current student account	Pass	Student can login website with right Username and Password
StudDashBoard00	Student can not view Dashboard's panels	Student DashBoard	Student can not access DashBoard page and DashBoard must display correct information	Student role will not be able to access and view DashBoard page because this page is not avaialde	FAIL	Student had a dashboard
StudDashBoard01	Student can view panel display total number of blog post on DashBoard	Student DashBoard	Student can access DashBoard page and DashBoard must display correct information	Correct Display Student's DashBoard Information	Pass	Student can Export Student Profile without Tutor
StudDashBoard02	Student can view DashBoard's Senders and Receivers Panels	Student DashBoard	Student can access DashBoard page and DashBoard must display correct information	Correct Display Student's DashBoard Information	Pass	Student can Export Student Profile without Tutor
StudChangePassword	Student must be able to change student account's password	Student Change Password	Student must login	Student is able to change password by entering new password details	Pass	Student role must be able to change their current password

StudDocument	Student can upload new document into the system	Student Upload Document	Student must first choose a file to upload before clicking on upload or submit button	Student is able upload new document into the system by choosing correct file, fill in the descriptions and click on submit button	Pass	Student role must be able to upload new document into the system
StudMeeting01	Student can add new meeting in system calendar	Student Meeting	Student must fill in all required fields in meeting options	Student is able to add new meeting in the system calendar	Pass	Student role must be able to add new meeting in the system calendar
StudMeeting02	Student can reset meeting options to previous chosen state	Student Meeting	The meeting fields must be already filled in order to perform reset function	Student is able to reset meeting fields to previous choosen state by clicking on reset button	Pass	Student role must be able to reset meeting fields
StudBlog00	Student's new blog post does not display name of the current logged in account	Student Add New Blog	Student must login	Student Blog Post function did not display correct information generated from database	FAIL	Student role must be able to add new blog
StudBlog01	Student can create new blog	Student Add New Blog	Student must login	Student successfully create a new blog post on blog page	Pass	Student role must be able to add new blog
StudBlog02	Student can edit admin's blog post	Student Edit Blog	Student must login	Student successfully edit blog written by admin on blog page	Pass	Student role must be able to edit blog post written by admin
StudBlog03	Student can comment on all blog posts	Student Comment Blog	Student must login	Student successfully comment on a blog post on blog page	Pass	Student role must be able to comment on all blog posts
StudChatBox00	Only one room display for all student and tutor roles	Student Chat Box	Student must login and choose another user to chat with	Student can not create another room to chat with another specific user in the Chat Box	FAIL	Student role must be able to chat with other user in the system
StudChatBox01	Student can chat with other users in the system	Student Chat Box	Student must login and choose another user to chat with	Student successfully send the input message and other user will see the message in their chat box	Pass	Student role must be able to chat with other user in the system
<u>Tutor's Test Log</u>						
TurLogin01	Tutor login successfully with provided Username and Password	Tutor Login	Username and Password must exist on the database	Redirected to the Dashboard of current student account	Pass	Tutor can login website with right Username and Password
TurLogin02	Tutor login failed with provided Username and Password	Tutor Login	Username and Password did not exist on the database	Display the wrong pass/username message	Pass	Tutor can login website with right Username and Password
TurDashBoard00	Tutor can not view Dashboard's panels	Tutor DashBoard	Tutor can not access DashBoard page and DashBoard must display correct information	Tutor role will not be able to access and view DashBoard page because this page is not avaiالبة	FAIL	Tutor had a dashboard
TurDashBoard01	Tutor can view panel display total number of blog post on DashBoard	Student DashBoard	Tutor can access DashBoard page and DashBoard must display correct information	Correct Display Tutor's DashBoard Information	Pass	Tutor can Export Student Profile without Tutor
TurDashBoard02	Tutor can view DashBoard's Senders and Receivers Panels	Student DashBoard	Tutor can access DashBoard page and DashBoard must display correct information	Correct Display Tutor's DashBoard Information	Pass	Tutor can Export Student Profile without Tutor
TurChangePassword	Tutor must be able to change student account's password	Tutor Change Password	Tutor must login	Tutor is able to change password by entering new password details	Pass	Tutor role must be able to change their current password
TurDocument	Tutor can upload new document into the system	Tutor Upload Document	Tutor must first choose a file to upload before clicking on upload or submit button	Tutor is able upload new document into the system by choosing correct file, fill in the descriptions and click on submit button	Pass	Tutor role must be able to upload new document into the system
TurMeeting01	Tutor can add new meeting in system calendar	Tutor Meeting	Tutor must fill in all required fields in meeting options	Tutor is able to add new meeting in the system calendar	Pass	Tutor role must be able to add new meeting in the system calendar
TurMeeting02	Tutor can reset meeting options to previous chosen state	Tutor Meeting	The meeting fields must be already filled in order to perform reset function	Tutor is able to reset meeting fields to previous choosen state by clicking on reset button	Pass	Tutor role must be able to reset meeting fields
TurBlog00	Tutor's new blog post does not display name of the current logged in account	Tutor Add New Blog	Tutor must login	Tutor Blog Post function did not display correct information generated from database	FAIL	Tutor role must be able to add new blog
TurBlog01	Tutor can create new blog	Tutor Add New Blog	Tutor must login	Tutor successfully create a new blog post on blog page	Pass	Tutor role must be able to add new blog

TurBlog02	Tutor can edit admin's blog post	Tutor Edit Blog	Tutor must login	Tutor successfully edit blog written by admin on blog page	Pass	Tutor role must be able to edit blog post written by admin
TurBlog03	Tutor can comment on all blog posts	Tutor Comment Blog	Tutor must login	Tutor successfully comment on a blog post on blog page	Pass	Tutor role must be able to comment on all blog posts
TurChatBox00	Only one room display for all student and tutor roles	Tutor Chat Box	Tutor must login and choose another user to chat with	Tutor can not create another room to chat with another specific user in the Chat Box	FAIL	Tutor role must be able to chat with other user in the system
TurChatBox01	Tutor can chat with other users in the system	Tutor Chat Box	Tutor must login and choose another user to chat with	Tutor successfully send the input message and other user will see the message in their chat box	Pass	Tutor role must be able to chat with other user in the system
